

Netflix Business Case Study - Exploratory Data Analysis (EDA)

Objective:

Analyze the Netflix dataset to uncover insights and provide data-driven business recommendations for growth.

◆ Step 1: Understanding the Dataset

1. What is the shape of the dataset (number of rows and columns)?
 2. What are the first few entries in the dataset?
 3. How many unique values are there in each column?
 4. What are the data types of each column?
 5. How many missing values exist in each column?
-

◆ Step 2: Data Cleaning and Preprocessing

6. How can missing values be handled in different columns?
 7. Are there any incorrect or inconsistent values in the dataset?
 8. What transformations are needed to convert data into the correct format?
 9. How can we convert the `date_added` column into a proper datetime format?
 10. What are the unique content types (Movie/TV Show) in the dataset?
-

◆ Step 3: Exploring the Dataset Using Pandas

11. What is the distribution of content (Movies vs. TV Shows) on Netflix?
 12. What are the different ratings available on Netflix, and how are they distributed?
 13. How many unique genres are available in the dataset?
 14. How many movies and TV shows have been directed by each director?
 15. How many shows/movies were added to Netflix each year?
-

BONUS ◆ Step 4: Insights and Trends

16. What is the oldest and most recent movie/TV show available on Netflix?

17. Which year had the highest number of content releases?
 18. Which are the most common genres on Netflix?
 19. Who are the top 10 directors with the most content on Netflix?
 20. What are the most frequent movie durations?
-

Bonus ⇨ Step 5: Business Insights & Recommendations

21. What types of content have been increasing over the years?
22. What kind of content should Netflix focus on for future growth?
23. How does Netflix's content strategy compare with user preferences?
24. How can Netflix optimize its content acquisition based on past trends?
25. What insights from this dataset can help Netflix improve its recommendation algorithm?

Note: “Bonus steps” refer to optional tasks that are not mandatory and do not contribute to your marks. These steps are meant for self-assessment, allowing you to gauge your understanding and proficiency in EDA.
